MAGNUS OLESEN CARE

Med vores høje kvalitetsstandarder og historik med hensyn til de særlige behov inden for Care, er en række af vores produkter velegnet til Care-markedet. Derudover er en række af vores møbler designet specielt til Care-segmentet. Produkterne er udviklet i tæt samarbejde med brugere (brugerdrevet design) samt arkitekter og interiørdesignere specialiseret inden for segmentet. Der lægges særlig vægt på krav til hygiejne, hård brug, sikkerhed, stabilitet og holdbarhed af møblerne uden at gå på kompromis med komfort og æstetik.

Det er Magnus Olesens ambition at lave møbler, der ikke alene lever op til de høje kvalitetskrav, der stilles i områder med intensivt brug og varierende brugssituationer, men også tager højde for sundhedssektorens særlige behov.

Her er der særlig fokus på hygiejne og rengøring, og Magnus Olesen arbejder løbende på optimering af disse to forhold. Overfladerne skal kunne modstå afsprøjtning og helst være bakteriehæmmende. Magnus Olesen arbejder derfor i overvejende grad med træ, linoleum og PUR – materialer, der alle har en bakteriehæmmende effekt.

Størstedelen af produkterne er dekomponerbare, og f.eks. et sæde/sædebetræk, en ryg eller et armlæn kan derfor om nødvendigt hurtigt udskiftes, således at møblerne konstant vil kunne være i brug og deres levetid forlænges yderligere.

Møblerne skal også understøtte de særlige krav, der er på dette område i forbindelse med brugernes komfort og tryghed - møblernes ergonomi og stabilitet. Vi har derudover særligt fokus på, at møblernes visuelle kvalitet opleves som noget ganske særligt. Møblerne er designet til at være langtidsholdbare, både i styrkemæssig henseende og i forhold til den arkitektur, de indgår i.

MAGNUS OLESEN CARE

With our high quality standards and history of consideration of the special needs within Care, a variety of our products are suitable for the Care market. In addition a number of products have been especially designed for the Care segment. The products are developed in close collaboration with users (user-driven design) as well as architects and interior designers specialized within the segment. Special attention is paid to demands on hygiene, heavy use, safety, stability and durability of the furniture, without compromising on comfort and aesthetics.

The ambition of Magnus Olesen is to manufacture furniture which does not only meet the high demands for quality required in areas with intensive and varying use, but also takes into consideration the special needs within the Care sector.

Within this area special attention is paid to hygiene and cleaning, and Magnus Olesen is continuously striving to optimise performance within these two areas. The surfaces must withstand disinfection and preferably be anti-bacterial. This is why Magnus Olesen mainly works with wood, linoleum and PUR-rubber, all with anti-bacterial properties.

The major part of our Care sector products are made for disassembly and so, if necessary, parts like a seat/seat cover, back support or an arm rest can easily be exchanged, in order for the furniture to be in constant use and ensuring that the lifetime of the products is further extended.

All our Care products are manufactured to support the special demands of our customers in this sector with respect to ergonomics, comfort, safety and stability. Magnus Olesen's particular concern is that the visual aesthetics of the furniture are regarded as something out of the ordinary. Our furniture is designed to be durable, both with respect to strength and in relation to the architecture of which it is a part of.

Butterfly Chair

BÆREDYGTIGHED

DE GRUNDLÆGGENDE ELEMENTER I VORES PRODUKTER ER NATURLIGE MATERIALER SOM TRÆ, LINOLEUM, LÆDER OG ULD.

PRODUKTION I DANMARK

Vi tror på det danske håndværk og har produceret i Danmark helt siden 1937. Træ og andre råvarer omdannes til stole og borde lokalt i Danmark. Med vores fabrik i Danmark arbejder vi målrettet for en produktion, der lever op til de skrappeste miljøkrav.

ANSVARLIGT FORBRUG AF MATERIALER

Magnus Olesens produktion er baseret på bæredygtige materialer. Siden 2016 har Magnus Olesen været FSC®-certificeret (FSC-C131817).

Vores miljøvalg gælder ikke kun vores træ, men også andre materialer i vores produktion. Vi arbejder f.eks. med trivalent krom som er miljøcertificeret. En række af vores borde er lavet af Honeycomb-materiale som minimerer materialeforbruget, og gør bordene lette og nemme at håndtere.

CIRKULÆR ØKONOMI/ DESIGN FOR DISASSEMBLY/ TAKE BACK

Vi arbejder med cirkulær økonomi og hovedparten af vores produkter er designet med henblik på adskillelse, så de er nemme at genbruge og recycle.

KLIMAKLAR PRODUKTIONSVIRKSOMHED

I 2024 afsluttede Magnus Olesen programmet 'KLIMAKLAR – CLIMATE-FIT MANUFACTURING COMPANY'. Et initiativ af DI – Dansk Industri, der hjælper danske produktionsvirksomheder med at få indsigt i CO₂-kortlægning og at udarbejde målrettede reduktionstiltag for at nå klimamålene.

Programmet understøtter den grønne omstilling og hjælper virksomheder med at deltage i det overordnede mål om at gøre Danmark til verdens første klimaneutrale produktionsindustri.

SUSTAINABILITY

THE BASIC ELEMENTS OF OUR PRODUCTS ARE NATURAL MATERIALS
SUCH AS WOOD, LINOLEUM, LEATHER AND WOOL.

PRODUCTION IN DENMARK

We believe in Danish craftsmanship and have produced in Denmark ever since 1937. Wood and other raw materials are converted into chairs and tables locally in Denmark. With our factory in Denmark we work purposefully for a production that meets the strictest environmental requirements.

RESPONSIBLE USE OF MATERIALS

Magnus Olesen's production is based on sustainable materials. Since 2016, Magnus Olesen has been FSC® certified (FSC-C131817). Our environmental choices apply not only to our wood but also to other materials in our production. E.g. we work with trivalent chrome which is environmentally certified. A variety of our tables are made with Honeycomb material: minimizing the use of material, making the tables lightweight and easy to handle.

CIRCULAR ECONOMY/ DESIGN FOR DISASSEMBLY/ TAKE BACK

We work with circular economy and the majority of our products are designed for disassembly making them easy to recycle and reuse.

CLIMATE-FIT MANUFACTURING COMPANY

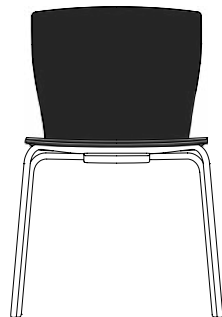

In 2024 Magnus Olesen completed the program 'KLIMAKLAR – CLIMATE-FIT MANUFACTURING COMPANY'. An initiative by DI – Dansk Industri, that enables Danish production companies to gain insights into the use of CO2 mapping and to prepare targeted reduction measures to achieve climate objectives. It supports green transitioning and helps companies to participate in the overall goal of making Denmark the world's first climate neutral manufacturing industry.

TAKE BACK

/ Magnus Olesen producerer med udgangspunkt i Danmark kvalitetsmøbler, der er tiltænkt et langt liv. Vi arbejder med bæredygtighed, social ansvarlighed og cirkulær økonomi som væsentlige elementer i virksomhedens forretningsstrategi. Magnus Olesen ønsker at tage ansvar for det omgivende miljø og medarbejdere i produktionsprocessen såvel som produkterne i hele deres livscyklus – fra at produktet er nyt og til det endeligt dekomponeres og bortskaffes. Et langt liv og komponenter, der er baseret på ædle materialer, som kan dekomponeres, medvirker til reduktion af miljøbelastningen.

Produkterne er designet af ledende designere med sigte på at gøre designet langtidsholdbart, men også med henblik på at produkterne kan skilles ad, så sliddele kan udskiftes til glæde for miljøet.

I forbindelse med køb af Magnus Olesen produkter tilbyder Magnus Olesen mulighed for en "take back" aftale på de indkøbte kvalitetsmøbler.

// Based in Denmark, Magnus Olesen produces quality furniture that is intended for a long life. We work with sustainability, social responsibility and circular economy as essential elements of the company's business strategy. Magnus Olesen wants to take responsibility for the surrounding environment and employees in the production process as well as the products throughout their life cycle - from the product being new and until it is finally decomposed and disposed of. A long life and components based on precious decomposable materials help to reduce the environmental impact.

The products are designed by leading designers with focus on making the design long-lasting as well as easy to disassemble so that parts can be replaced which benefits the environment in the long run.

In connection with the purchase of Magnus Olesen products, we offer the possibility of a "take back" agreement on the quality furniture purchased.
